Profile

Full Stack Developer with a strong Computer Science foundation, experienced in building end-to-end web and mobile applications using React.js, JavaScript, MongoDB, and Flutter. Comfortable working across the stack, from database design to responsive, user-facing interfaces. Known for clean code, clear documentation, and turning client needs into working products, not just prototypes, with a growing interest in business development.

Professional Experience

Business and Technical Associate , <i>BizRolin</i>	09/2026 – Present
Coordinate business operations and technical support.	
Business Development Specialist , <i>DevRolin</i>	09/2026 – Present
